Achmad Shiddiq Alimudin

Backend Developer

A never-ending learner who is interested in software development, especially backend development. After graduating from Pelita Bangsa's University with a Bachelor of Informatics Engineering, I joined bootcamp at Fazztrack to depeen my fundamental skills in Back-End Development and shifting my career from chemical analyst to Back-End Developer. Have expertise in several programming languages such as Javascript & Golang. I'm very interested and challenged to continue to explore the Backend Development Ecosystem, especially with Go Language.
